■ PRO-ACTIVE- Control:

Permanent, proactive monitoring of the performance data and alerts in the case of deviations – so that you can take countermeasures in good time before a fault threatens your chilled goods; world's most accurate temperature control in refrigerated areas thanks to two standard PT-1000 sensors.

- **External housing** made from galvanised sheet steel (rust-proof), with white, anti-scratch powder coating. Length of the plug cable: approx. 2.8 m.

- **Adjustable feet** to compensate uneven floors.

- **Interior** made from smooth aluminium with colourless protective coating. Gibs (every 15 mm) for flexible interior arrangement.

- **Interior** of LABO 340 PRO-ACTIVE consists of one black drawer and four plastic-coated shelves on overlays. Interior of LABO 468 PRO-ACTIVE consists of four plastic-coated shelves on overlays.

- **Extra-thick 55 mm energy saving insulation**, made from high-quality, compression-moulded and environmentally friendly material.

- **Self-closing door** with easy-to-replace plastic magnetic seal frame, lockable.

- **Door hinge** on the right-hand side (by default, see illustration), or the left-hand side, can be retrofitted.

- **Forced-air cooling**, switches off automatically when you open the door, ensures a uniform temperature and minimizes temperature deviation.

- **Automatic defrosting** with time limit and temperature monitoring.

- **Condensate evaporates** in the refrigerating machine interior.

- **Key switch** protected control panel against tampering. Membrane keyboard with digital temperature display and minimum/maximum temperature memory.

- **Warning functions** with visual and audible alarm signal in the case of temperature deviations or other malfunctions. Door open alarm after 60 seconds.

- **Alarms** can be forwarded using a potential-free contact (e.g., to a mobile phone with optional GSM-Module or to a control centre).

- **Power failure alarm** (visual and audible alarm), the monitoring unit remains in operation for approx. 30 hours on battery power.

- **Data documentation** can be read via USB interface with KIRSCH Datanet software.

- **Antifreeze** against sub-zero temperatures.

- **Statically ventilated** (LABO 340 PRO-ACTIVE) or **ventilation-enforced** (LABO 468 PRO-ACTIVE) refrigerating machine, hermetically sealed, energy saving, low-noise, easy to service.
