

# ANIOSRUB 85 NPC

Disinfecting solution  
for hydroalcoholic  
hand-rubbing and  
body clean disinfection

## Concept SES :

### SAFETY

- ANIOSRUB 85 NPC is formulated without fragrance nor colouring.

### EFFICIENCY

- Wide antimicrobial spectrum: active against bacteria, yeasts, moulds and viruses.
- Hygienic treatment: 3 ml / 30 sec.
- Surgical disinfection: 2 x 3 ml / 2 x 45 sec.
- Body clean disinfection.
- Hydroalcoholic solution to be used without water.

### SIMPLICITY

- 1.5 ml dosing pump avoiding any over consumption (screwed on every bottle - except 75 ml bottle)
- Ready to use body cleaner disinfection.
- Supports made of PVC specially made for hydroalcoholic products.

**READY TO USE**  
2 pump squirts  
= 3 ml

## CHARACTERISTICS

- Ethyl alcohol 75.5 ml/l
- Flash point: +19.9 °C
- Density at 20°C: app. 0.870
- pH at +20°C app. 5.5 (near to skin pH)
- Aerobioccontamination study available on request.

## INDICATIONS

Hydroalcoholic solution for hygienic treatment, surgical disinfection by hand-rubbing and body clean disinfection to the passenger at the airport and port.

### Carry out hygienic treatment in these cases

Removal of gloves. At the start of service/at the end of service. A day-to-day activity, hotel activities. Treatments involving contact with healthy skin. After contact with patient in septic isolation. Before carrying out any invasive procedure (peripheral catheter, urinary probe and other similar devices). After contact with infected patient or his/her environment. Between patients after any potentially contaminating procedure. Before any contact with a patient in protective isolation. Before carrying out a lumbar puncture, ascites puncture or articular drain-off, or other similar procedures. Before handling intravascular devices, pleural drains, implantable chambers and other similar situations. In the case of a series of contaminating actions for the same patient.

### Carry out surgical disinfection in these cases

Before any surgical, obstetric or interventional radiology procedure. Before any procedure for which surgical asepsis is required: inserting a central or spinal catheter, implantable chamber, amniocentesis, pleural drain and other similar situations.

Carry out Disinfection for Body:

Fill in the Disinfection Solution to the Spraying Machine Tank.
