

# MICROSCOPE

## Model : BM 500

- Fully coated optical system offers sharp and distinct images over the field of view
- The coaxial focusing with ball-bearing guide works accurately and smoothly over focusing range. It comes with built-in tension adjustment. The focus stop is adjustable for preventing damage to slides and objectives.
- Focusing range : 15 mm. Fine focusing graduation : 0.002 mm
- The integral mechanical stage 132 mm x 145 mm with specimen holder offers a moving range 54 mm x 75 mm, which is controlled by coaxial knobs at low position for comfortable operation.
- Field diaphragm available for option, to be mounted on the base lens.

### SPECIFICATION :

<b>OBSERVATION</b>	Binocular head
<b>WIDE-FIELD EYEPIECE</b>	WF10X - 18 mm
<b>NOSEPIECE</b>	Quadruple nosepiece
<b>DIN ACHROMATIC OBJECT.</b>	4X / 0.10, 10X / 0.25, 40XR / 0.65, 100XR (oil) / 1.25
<b>STAGE</b>	Built-in mechanical stage size 132 mm x 145 mm Moving range 54 mm x 75 mm
<b>CONDENSER</b>	1.25 N.A. Abbe condenser with iris diaphragm and filter holder
<b>ILLUMINATION</b>	Halogen bulb 20W/6V, Adjustable intensity University power 85 V-265V
<b>FOCUSING SYSTEM</b>	Coaxial focusing system with focus stop
