

Blood Bag Systems

Triple Blood Bag System

| |
|-----------------------------|
| Sizes : 250 ml + 300 ml x 2 |
| 350 ml + 300 ml x 2 |
| 450 ml + 300 ml x 2 |
| 500 ml + 300 ml x 2 |

HLL Lifecare Limited set up its Blood Bag manufacturing facility in the year 1995 at Akkulam, Thiruvananthapuram. The state of art manufacturing facility guarantees HL Haemopack Blood Bag system to be distinct & the best. The facility is equipped with Class 10,000 Clean Rooms and critical operations are performed in Class 100 Laminar Air flow benches.

HLL offers a wide range of Blood Bag system which includes Single, Double, Triple, Quadruple bags in varied capacities ranging from 100ml to 500ml. Variants like Bags with Leukodepletion filters, Sampling port, Diversion bag, Needle injury protector, Top and bottom outlet bag and Autologous Blood bags also forms part of our product range.

HLL Akkulam Factory has ISO 13485:2003 certification from DNV, the product CE marking from DNV AS Norway and the Environmental Management System ISO 14001 & OHSAS 18001 certifications from TUV NORD CERT GmbH.

The HL Haemopack Blood Bag System is manufactured from superior grade Poly Vinyl Chloride (PVC) based material which make it flexible, strong and able to withstand rough handling during use.

The HLHaemopack Blood bag is designed for efficient and safe collection, identification, storage and separation of blood components in a closed system and infusion of contents. The device has adequate provision for suspension from all sides, which does not interfere in use.

HL Haemopack offers minimum risk from contamination, air embolism and interaction between containers and contents. By virtue of state of the art production facilities and latest quality control systems HL Haemopack is distinct, different and best choice to meet advanced transfusion service requirements.

Common features :

- ◆ Siliconised ultra thin walled, 3G, sharp Japanese needle ensures smooth andatraumatic venipuncture
- ◆ Soft, frosted and flexible kink resistant tubing with unique identification number of intervals of 10 cm
- ◆ Tamper proof, safe and easy to open port covers to prevent contamination
- ◆ Manufactured from high quality medical grade PVC sheet
- ◆ Rounded shape of bag minimizes loss of blood components during transfer & transfusion
- ◆ Double, Triple and Quadruple blood bag systems are provided with snap tip and connector tube to allow smooth transfer of blood components and additive solution
- ◆ Tamper evident label
- ◆ Individually packed in special multi layer pouch and multiples packed in moisture barrier aluminium pouch
- ◆ Convenient hanger slots and holes allow easy suspension of the bags during collection & storage
- ◆ Anticoagulant CFD solution preserves whole blood up to 21 days
- ◆ Anticoagulant CFDA solution preserves whole blood up to 35 days
